Publication No. U520030175950A1

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: ROSWiggen, James
TITLE OF INVENTION: RNA Interference Mediated Inhibition of HIV Gene Expression Using
TITLE OF INVENTION: Interfering RNA
TITLE REPERENCE: 400/054 (MeHBOR1-665-B)
CURRENT APPLICATION NUMBER: US/10/225,023
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    APPLICANT: MCSWiggen, James

ORGANISM: Artificial Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  NUMBER OF SEQUENCES:
```

```
Sequence 47, Application US/09758881

Sequence 47, Application US/09758881

Sequence 47, Application US/09758881

Patent No. US20010029250A1

SERBRAL INFORMATION:
APPLICANT: Karras, James G

TITLE OF INVENTION: Antisense Oligonuclectide Modulation of STAT3

TITLE OF INVENTION: Expression
FILE REFERENCE: ISPH-0532

CURRENT PILING DATE: 2001-01-11

PRIOR APPLICATION NUMBER: US/09/758,881

PRIOR APPLICATION NUMBER: 09/288,461

PRIOR APPLICATION NUMBER: 09/288,461

PRIOR APPLICATION NUMBER: 09/288,461

PRIOR APPLICATION NUMBER: 09/288,461

NUMBER OF SEQ ID NOS: 152

SOFTWARE: PatentIn Ver. 2.1

SEQUENCE CHARACTERISTICS:

JENGTH: 20 base pairs

TYPE: mucleic acid

STRANDEDNESS: single

TOPOLOGY: linear

MOLECULE TYPE: other nucleic acid

DESCRIPTION: /desc = "Primer"

HYPOTHETICAL: NO

Sequence 62, Application US/09800631
Patent No. US20020082228A1
GENERAL INFORMATION:
APPLICANT: Jacqueline Wyatt
TITLE OF INVENTION: ANTIGENSE MODULATION OF BH3 INTERACTING DOMAIN DEATH AGONIST EXPRIBED FILE REFERENCE: ISPH-0544
CURRENT APPLICATION NUMBER: US/09/800,631
CURRENT PILING DATE: 2001-03-07
PRIOR FILING DATE: 2000-09-07
NUMBER: US/09/657,346
PRIOR FILING DATE: 2000-09-07
SEQ ID NOS: 175
LENGTH: 20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            APPLICANT: Gatanaga, T.
